Complications of Acute Stroke
Reza Behrouz, DO
Lee Birnbaum, MD

This practical, evidence-based guide is written for clinicians who provide in-hospital care to stroke patients. Covering specific post-acute stroke complications that require timely and urgent attention, the book provides a roadmap for assessing risk and monitoring, recognizing, and managing emergent problems that can lead to neurological deterioration or worse.

Cancer Genomics for the Clinician
Ramaswamy Govindan, MD
Siddhartha Devarakonda, MBBS, MD

Cancer Genomics for the Clinician is a practical guide to cancer genomics and its application to cancer diagnosis and care. The book begins with a brief overview of the various types of genetic alterations that are encountered in cancer, followed by accessible and applicable information on next generation sequencing technology and bioinformatics, tumor heterogeneity, whole genome, exome and transcriptome sequencing, epigenomics, and data analysis and interpretation. Each chapter provides essential explanations of concepts, terminology, and methods.

SITC’s Guide to Managing Immunotherapy Toxicity
Marc S. Ernstoff, MD
Igor Puzanov, MD, MSCI, FACP
Caroline Robert, MD, PhD
Adi M. Diab, MD
Peter M. Hersey, MD, PhD

Written by world experts affiliated with the Society for Immunotherapy of Cancer, this is the first book dedicated to clinical recommendations and strategies for managing adverse and life-threatening events caused by cancer immunotherapy treatment. Practical and applicable to the care of cancer patients receiving immunotherapy, this reference is indispensable for clinical oncologists, emergency physicians, hospitalists and other related practitioners in both the hospital and community clinic settings.

EMG: McLean Guide to Electrodiagnostic Medicine, 2nd Edition
Samuel K. Chu, MD
Prakash Jayabalan, MD, PhD
Christopher J. Visco, MD

Electrodiagnostic techniques—electromyography (EMG) and nerve conduction studies—are used to diagnose and evaluate nerve and muscle problems. Electrodiagnostic testing is an integral part of the resident education program in PM&R and neurology, yet there is often no consistent approach to training. For the beginner who is faced with the challenge of learning needle placement on the fly in a real-world clinical setting, this can be a daunting experience.

Handbook of Supportive Oncology and Palliative Care
Whole-Person Adult and Pediatric Care
Ann M. Berger, MSN, MD
Pamela S. Hinds, PhD, RN, FAAN
Christina M. Puchalski, MD, MS, FACP, FAAHPM

A practical guide to providing evidence-based and value-based care to adult and pediatric cancer patients experiencing severe symptoms and stressors due to cancer diagnosis, cancer treatment, and comorbid conditions. This accessible reference provides the art and science behind the whole-person and family approach to care by delivering the best practices to relieving a cancer patient’s symptoms across physical, psychosocial, and spiritual dimensions.
New

Spinal Cord Medicine
Steven Kirshblum, MD
Vernon W. Lin, MD, PhD

In this comprehensive, clinically directed, reference for the diagnosis and treatment of persons with spinal cord injury and related disorders, editors of the two leading texts on spinal cord injury (SCI) medicine have joined together to develop the premier reference for professionals in the field. Spinal Cord Medicine, Third Edition combines the unique approaches of previous editions and draws on the expertise of both seasoned editors, along with experienced chapter authors, to bring together in one volume the most up-to-date medical, clinical, and rehabilitative knowledge in spinal cord injury management across the spectrum of care.

Principles of Clinical Cancer Research
Loren K. Mell, MD
Ezra Cohen, MD
Phuoc T. Tran, MD, PhD
James B. Yu, MD, PhD
Qiang (Ed) Zhang, PhD

Provides comprehensive coverage of the fundamentals of clinical cancer research, including the full spectrum of methodologies used in the field. For those involved in research or considering research careers, this book offers a mix of practical advice and analytical tools for effective training in theoretical principles as well as specific, usable teaching examples. The clinical oncologist or trainee will find a high-yield, practical guide to the interpretation of the oncology literature and the application of data to real-world settings.

Strategies for Radiation Therapy Treatment Planning
Ping Xia, PhD
Andrew Godley, PhD
Chirag Shah, MD
Gregory M. M. Videtic, MD, CM, FRCPC
John Suh, MD

Provides radiation oncologists, physicists, and dosimetrists with a step-by-step guide to implementing external beam treatment plans that meet clinical requirements for each major disease site. As a companion book to the Handbook of Treatment Planning in Radiation Oncology 2nd Edition, this book focuses on the technical aspects of treatment planning and the major challenges in creating highly conformal dose distributions, referenced to as treatment plans, for external beam radiotherapy.

Artifacts in Clinical Neurophysiology
William O. Tatum, IV, DO

This atlas serves as a comprehensive working reference for a wide range of clinicians practicing in the field of clinical neurophysiology, including adult and pediatric neurologists, epileptologists, neurocritical care specialists, and electrophysiological technologists. Covering EEG, EMG, MEG, evoked potentials, sleep and autonomic studies, and ICU, critical care, and intraoperative monitoring, techniques, expert authors share examples of common and novel artifacts and highlight signature features to help practitioners recognize patterns and make accurate distinctions.

Radiation Oncology Question Review, 2nd Edition
Michael A. Weller, MD
Nikhil Joshi, MD
Anthony Mastroianni, MD, JD, MBA

Efficiently tests and reinforces your knowledge of key concepts, critical studies, and major clinical guidelines, with the most important radiation oncology citations included. Organized by treatment site, detailed questions cover natural history, epidemiology, diagnosis, staging, treatment options, and treatment-related side effects all in a newly configured format. Each question tests your recall and sharpens your skills so that you can practice and feel confident in your ability to manage all disease site areas according to the standard guidelines and key literature in the field.

Cancer Rehabilitation, 2nd Edition
Principles and Practice
Michael D. Stubblefield, MD

This completely revised second edition of the gold-standard reference on cancer rehabilitation provides a state-of-the-art overview of the principles of cancer care and best practices for restoring function and quality of life to cancer survivors. Authored by some of the world’s leading cancer rehabilitation experts and oncology specialists, the book opens with primer-level discussions of the various cancer types and their assessment and management, including potential complications, as a foundation for providing safe and effective rehabilitation.
New

Intraoperative Neurophysiology, 2nd Edition
A Comprehensive Guide to Monitoring and Mapping
Mirela V. Simon, MD

Completely revised and updated second edition of the leading reference on intraoperative neurophysiology, this book covers IOM from the most basic theoretical and technical concepts to the most sophisticated procedures, placing them within the specific surgical context. Written by a multidisciplinary team of experts from Massachusetts General Hospital/Harvard Medical School, Intraoperative Neurophysiology provides a step-by-step approach to monitoring and mapping for a wide variety of complex surgical procedures by progressively building on prior learned material.

Stereotactic Radiosurgery and Stereotactic Body Radiation Therapy (SBRT)
Dwight E. Heron, MD
M. Saiful Huq PhD, DABR, FAAPM, FInstP
Joseph M. Herman, MD, MSc

A comprehensive guide for the practicing physician and medical physicist in the management of complex intracranial and extracranial disease. It is a state-of-the-science book presenting the scientific principles, clinical background and procedures, treatment planning, and treatment delivery of SRS and SBRT for the treatment of tumors throughout the body. This unique textbook is enhanced with supplemental video tutorials inclusive to the resource.

Multiple Sclerosis and Related Disorders, 2nd Edition
Clinical Guide to Diagnosis, Medical Management, and Rehabilitation
Robert Fox, MD
Alexander Rae-Grant, MD
Francois Bethoux, MD

Revised and updated second edition of Multiple Sclerosis and Related Disorders: Clinical Guide to Diagnosis, Medical Management, and Rehabilitation, the only comprehensive but practical source of core information on multiple sclerosis and other demyelinating disorders. Intended as a ready reference for clinicians who provide ongoing care to MS patients, this book combines evidence-based science with experience-based guidance to present current standards and management protocols from leading MS centers.

Handbook of Cancer Survivorship Care
Maria Alma Rodriguez, MD
Lewis E. Foxhall, MD

Serves as a practical and concise guide for the multidisciplinary management of cancer survivors. Each chapter is authored by a team consisting of a seasoned oncologist and an experienced practitioner who provides direct services in survivorship care. Chapters reflect the importance of interdisciplinary collaboration and cover the high-yield pearls and clinical applications that lead to quality patient care outcomes.

Head and Neck Cancers
Evidence-Based Treatment
Athanassios Argiris, MD, FACP
Robert L. Ferris, MD, PhD, FACS
David I. Rosenthal, MD, FACP, FASTRO

Presents a practical, state-of-the-art resource for any clinical oncologist treating or managing patients with head and neck cancers, including oropharyngeal cancer, cancer of the oral cavity, laryngeal cancer, nasopharyngeal cancer, hypopharyngeal cancer, cancer of the sinuses and the skull base, salivary gland cancer, and neck lymphadenopathy.

Interventional Pain Procedures
Handbook and Video Guide
Michael Sabia, MD
Rajat Mathur, MD

This multimedia handbook and video atlas provides an interactive learning experience for practitioners who perform interventional procedures with radiographic guidance for acute or chronic pain. The print text is a formatted portable reference for reviewing anatomy, indications, physical examination findings, set-up, technique, and risks and complications for a wide range of head, neck, spine, and pelvic interventions. Includes 24 step-by-step procedural videos that walk users through the interventions.

**Hematology Board Review**  
*Blueprint Study Guide and Q&A*  
Francis P. Worden, MD  
Rami N. Khoriaty, MD  
Kathleen A. Cooney, MD  
Michael Deininger, MD, PhD  

A concise, outline-based study guide covering all topics that appear on the Hematology Certification Exam. The book includes all topics listed in the American Board of Internal Medicine (ABIM) blueprint as essential material for the exam and highlights topic areas that are often found on the test.

**Biostatistics for Oncologists**  
Kara-Lynne Leonard, MD, MS  
Adam Sullivan, PhD  

The first practical guide providing the essential biostatistics concepts, oncology-specific examples, and applicable problem sets to medical oncologists, radiation oncologists, and surgical oncologists. This concise book is divided into three parts. It begins with chapters on general statistical concepts to provide the important background on navigating biostatistics as well as key information on summarizing and graphing data, sampling, and statistical estimation. The second part explains the most imperative topics for interpreting and analyzing oncologic data using examples and problem sets from the field so that oncologists and trainees can systematically practice calculating and analyzing data through statistical software furthering their study and understanding of key concepts.

Practical Surgical Pathology of the Breast
Juan P. Palazzo, MD
Provides anatomic pathologists with the essential knowledge and tools to navigate breast cases and classification systems that are commonly and uncommonly found in everyday practice. Particularly challenging topics such as understanding the molecular mechanisms linked to breast cancer and the interpretation of molecular tests, are covered in clear prose, along with useful discussions on diagnostic challenges written by world experts.

Inherited Metabolic Epilepsies, 2nd Edition
Phillip L. Pearl, MD
Completely revised, expanded, and updated new edition of the singular reference bridging clinical epilepsy and inherited metabolic disease. The text brings together leading international authorities with expertise in both fields to present state-of-the-art reviews covering the science, recognition, and treatment of the inherited metabolic epilepsies and related disorders.

Questions and Answers
Nancy Futrell, MD
Dara G. Jamieson, MD
Covering the broad mix of topics found on the ABPN content outline and tested on the vascular neurology certification exam, this singular review tool is indispensable for candidates and others looking to assess skills and core knowledge in this important practice area. Questions and answers with detailed rationales and references address the key components to an in-depth understanding of the field including basic science, pharmacology, epidemiology and prevention, recovery and rehabilitation, and features, evaluation, and treatment of cerebrovascular diseases and associated clinical problems.

Androgen Deprivation Therapy, 2nd Edition
An Essential Guide for Prostate Cancer Patients and Their Loved Ones
Richard J. Wassersug, PhD
Lauren M. Walker, PhD
John W. Robinson, PhD, R Psych

This expanded new edition, remains the only guide written exclusively about the side effects of hormone therapy. This is a comprehensive workbook for prostate cancer patients and their loved ones, filled with practical advice from experts in the field. It is not only an informational manual, but a guide for both patients and partners about ways to make changes in their own lives that can keep them healthy and positive when the patient is on ADT.

Stronger After Stroke, 3rd Edition
Your Roadmap to Recovery
Peter G Levine

Written for stroke survivors, their caregivers, and loved ones, Stronger After Stroke presents a new and more effective treatment philosophy that is startling in its simplicity: stroke survivors recover by using the same learning techniques that anyone uses to master anything. Incorporating the latest treatments, medications, and scientific thinking on recovery, the third edition of Stronger After Stroke is a field manual for stroke survivors to take charge and achieve the highest level of recovery.

New

Multiple Sclerosis: Questions and Answers for Patients and Families
Jonathan Howard, MD

If you or a loved one has been diagnosed with multiple sclerosis, this book should be your first stop. Written in easy-to-understand language by an MS specialist, this guide covers the questions that patients and their families typically ask—from disease basics, to treatment options, managing relapses, and lifestyle concerns, including diet and working.

Prostate Cancer: Thriving Through Treatment to Recovery
Lisa A. Price, ND

This valuable guide provides direction for prostate cancer patients through diet, exercise, and mental health plans tailored to treatment protocols and cancer types. Written by a naturopathic physician and packed with recipes, exercise regimens, and other practical self-care actions to remediate damage and reduce short- and long-term effects during and after cancer treatment. This book offers support with safe and scientifically proven practices to help mitigate side effects of conventional cancer therapies and enhance quality of life to aid in recovery.

2019

Breast Cancer: Thriving Through Treatment to Recovery
Lisa A. Price, ND

This valuable guide provides direction for breast cancer patients through diet, exercise, and mental health plans tailored to treatment protocols and cancer types. Written by a naturopathic physician and packed with recipes, exercise regimens, and other practical self-care actions to remediate damage and reduce effects throughout cancer treatment. This book offers support with safe and scientifically proven practices to help mitigate side effects of conventional cancer therapies and enhance quality of life to aid in recovery.
